

Introducing the best way to generate meeting packs, watermark and track downloaded documents, and archive or share files in PDF format.

The Muhimbi PDF Converter for SharePoint Online is built on the same foundation as its forerunner, the popular PDF Converter for SharePoint (2007–2019). Now paired with SharePoint Online, Office 365, Microsoft Flow, and Logic Apps, users can convert, merge, secure, OCR and watermark common file formats (including InfoPath, Office, Visio, HTML, MSG, Images, AutoCAD, and more) either automatically through workflows, a REST based API, or manually from an intuitive user interface.

Many great features packed in one cloud based PDF converter

- High quality PDF conversion 
- Workflow enabled, fully automated operation
- Friendly user interface for end-users
- Supports Word, Excel, Visio, PowerPoint, Publisher

- Professional and responsive support desk
- Frequent updates & improvements
- Includes comprehensive documentation
- Fully hosted solution, no install or maintenance needed
- Compatible with SharePoint Online & App Store

A safe and easy to use cloud based solution with the quality and support you expect from Muhimbi

The introduction of SharePoint Online and Office 365 has made it even easier to work with SharePoint. However, the convenience offered by cloud services doesn't come without some familiar concerns.

The Muhimbi PDF Converter for SharePoint Online lets users share documents better and safer. It adds the ability to convert between most file formats manually or as part of an automatic workflow.

It also comes with security features such as watermarking, encryption, and password protection. That's just the tip of the iceberg though, The Muhimbi PDF Converter for SharePoint Online has a lot more to offer.

Several subscription tiers are available to cover the needs of all organisations ranging from the very smallest to the largest of enterprises.
